Test Suite Make-up

The test suite comprises malware received to the lab in the 30 days prior to the stated test date. Included within the suite are a range of known-good files taken from the host OS and genuine applications.

Total
1578

Genuine Files
74652

Threat Rating

All malware samples received to the lab are analysed and assigned a threat rating from Low/PUP to Critical. To conduct Checkmark Certification tests, those samples with a threat rating of either High or Critical are selected.

Critical
260

High
1318

Included Traits

During analysis, all received samples are assigned one or more category tags based on the observed behavior. As such, the total number of tags may exceed the file count of the Test Suite.

Spyware	737
Trojan	938
Stealer	714
Ransomware	74
